

MISS CURTIS IS THE BRIDE OF J. H. ORTHEL

EPISCOPAL CHURCH SCENE OF PRETTY WEDDING AS PROMINENT YOUNG PEOPLE ARE JOINED IN WEDLOCK.

(From Sunday's Daily)

One of the prettiest weddings of the winter season was that which took place yesterday at 2 o'clock at the Episcopal church, when Miss Marie Curtis became the bride of Mr. John H. Orthel. Only relatives and a few intimate friends witnessed the ceremony.

The young couple entered the church together to the sweet strains Mendelssohn's wedding chorus played by Grover Marsh, and during the ceremony the Venetian Love song was softly rendered. Before an improvised altar of ferns and palms, banked with beautiful white carnations, Rev. H. H. Shires read the wedding service which made this young couple one. A most impressive ring ceremony was used.

The bride is a petite brunette and never looked more beautiful than on her wedding day. She wore a white duchess satin, with draped skirt, trimmings of rose point lace and net. Her tulle veil caught to a fascinating little cap and fastened with orange blossoms, fell in graceful folds to the hem of dress. She carried a shower bouquet of bridal roses and sweet peas.

The bride's only attendant was her youngest sister, Miss Laura Curtis, who acted as maid of honor. She wore pink crepe de chene with a large picture hat to match and carried a corsage bouquet of pink sweet peas. Mr. Fred Curtis attended the groom as best man.

After the ceremony a reception was held at the new home of the bride and groom, 341 North Mt. Vernon Ave. The color scheme of pink and white was carried out in the decorations, and a delicious iced course was served to the guests.

Mr. and Mrs. Orthel left on the afternoon train for California, where they will spend their honeymoon. The bride's traveling suit was a beautiful rose taupe chiffon broadcloth, with hat to match. Her handsome furs completed her costume, these being a gift from her parents.

The bride is the eldest daughter of Mr. and Mrs. A. G. Curtis, who have made Prescott their home for many years. She is a universally loved young lady because of her pleasing manner and charming personality.

Mr. Orthel is the son of Mr. and Mrs. J. M. Orthel of Archie, Missouri, and he, too, has been a resident of Prescott for many years and holds a responsible position with the Head Lumber Company.

It is with the best wishes for much happiness that these young people start out on life's journey. After March 1st, they will be at home to their many friends at 341 North Mt. Vernon Avenue.

ENLISTMENTS IN NAVY FOR WAR DURATION

(From Sunday's Daily)

The local branch of the naval recruiting station was notified yesterday by wire that the navy department has decided to change somewhat the procedure of enlistment and allow the naval recruits to enlist for the duration of the war instead of for a four-year term as was formerly the case. It is believed that the department hopes by this new move to greatly increase the number of recruits, as there was always more or less antipathy in some quarters against enlisting for such a long term as four years.

While all of the young fellows who have heretofore enlisted in the sea service did so with the expectation of remaining in the service for four years, it is understood that by virtue of the new ruling, they can get out with an honorable discharge at the end of the war if they so desire. William Sieckman, local recruiting officer, believes that the new regulations will result in a big rush to enlist now that the boys know that they will not be compelled to remain in the navy after the days of fighting are over.

The department yesterday notified Mr. Sieckman that the service is badly in need of aviation mechanics and blacksmiths, and that hereafter all men proficient in these branches will be started in service at \$61 a month.

VERDE DISTRICT DOESN'T FANCY THIS MEASURE

JEROME, Jan. 12.—Twelve mining companies active in the Verde district will be forced to suspend if the government carries out its reported intention to order work stopped on all non-producers. Many private owners who are developing their claims will be restrained from doing further work until the war is over. Several companies that will be in the active class shortly if there is no governmental interference must re-

main idle until the end of the great conflict.

The developing companies are the Jerome Superior, Jerome Verde, Calumet & Jerome, Gadsden, Verde Combination, Green Monster, Jerome Copper, Jerome St. Louis, Grand Island, Pittsburgh Jerome, United Verde and Shea.

On the outskirts of the district are the Verde Squaw, Squaw Peak, Blue Monster and numerous other active properties.

Among those that will probably be active shortly if the government does not order all prospect work suspended are the Jerome Daisy, Great Verde Extension, Dundee-Arizona, Venture Hill, Verde Apex, Verde Hub, and Jerome Portland.

The active companies spend thousands of dollars every week in Jerome and a governmental order prohibiting work on non-producing mines, or work that may not mean immediate production, would be a terrible blow to this camp. But Jerome could patriotically grin and bear it were other unfortunate results not certain to ensue.

Stopping work on prospects would throw hundreds of men out of work in this immediate district—men accustomed to no other work except copper mining. As there is no shortage of labor in any copper camp, they would not find work again.

RICHARDS COPPER CO. DISSOLVED BY COURT

COMPANY HAD TRANSFERRED HOLDING TO ANOTHER ORGANIZATION AND STOCKHOLDERS ASKED FOR WIND UP.

(From Tuesday's Daily.)

Upon the petition of D. W. Russell, one of the stockholders, the old Richards Copper Company was formally dissolved by court decree, the case having been disposed of yesterday afternoon by Judge Sweeney in the Superior court. Russell filed the dissolution suit several months ago, the complaint setting forth the fact that the company no longer had any business to transact. The group of claims in the Verde district owned by the corporation was traded to the Verde Combination Copper Company for shares in the latter organization, and it was the desire of the Richards stockholders that the old company be disposed of according to Hoyle.

Divorce Granted.

Mrs. Jennie H. Shanks was yesterday granted a decree of divorce from William B. Shanks, the plaintiff having proven to the satisfaction of Judge Sweeney that he had deserted her and that he did not provide for her support. The couple was married in 1902, and separated a year or so ago.

The divorce suit of Mrs. Amanda Short against Theodore Short was up for trial yesterday afternoon, and after hearing all of the evidence introduced by the plaintiff, the court took the matter under advisement.

Mrs. Stoya Dragish yesterday filed suit asking for a divorce from Boza Dragish, the couple being residents of Jerome. The complaint charges the defendant with desertion and failure to provide for the wife and small child. Mrs. Dragish asks for possession of the youngster.

Lanahan Pleads Guilty

John Lanahan, who was arrested a month or so ago when the officers raided his home and found a barrel of whiskey in the kitchen, was arraigned in court yesterday afternoon and entered a plea of guilty. He will receive his sentence next Friday morning at 10 o'clock.

Probate Matters.

The will of the late James T. Knight was yesterday admitted to probate and James E. Sprague named as executor. The will, which was drawn up on July 11, 1917, directs that all property possessed by the testator at the time of his death be given to his friend, G. A. Widman. The property left by Knight consists of an insurance policy of the value of \$410 and about \$75 worth of personal property.

The final report of William Ritter, administrator of the estate of the late Jacob Ritter was filed and accepted yesterday. The accounting shows that at present there is on hand to the credit of the deceased the sum of \$13,079.80 in cash in several of the local banks. The expenses incidental to the final illness and burial of the deceased amounted to \$1,266.10 these items to be deducted from the cash holdings. The will was filed on January 12, 1917, and directs that the residue of the estate be divided equally among the three sons, one daughter and one granddaughter of the deceased.

Judge Crosby on Bench.

Judge Crosby of Apache county was here yesterday to sit in a case wherein Judge Sweeney was disqualified. The action was that of the Arizona Mine Supply Company vs. the Monica Mining & Milling Company. The testimony was taken and the final disposition of the matter will come up on Saturday, January 19th.

MINES IN ARIZONA IN 1917 PRODUCED METAL WORTH \$214,000,000

COPPER VALLEY CO. APPOINTS DIRECTORATE

(From Tuesday's Daily.)

The annual meeting of the stockholders of the Copper Valley Mining Company was held yesterday at the offices of the company in the Pythian building in Prescott, and the following board of directors was elected: W. L. Richards, J. T. Richards, Frank C. Whisman, D. C. McElver and Chas. H. Dunning, all of Prescott, and John A. George and Thomas A. McKennell of New York City.

This company owns about 200 acres in the Copper Basin section, and contracts have been placed for the sinking of a shaft 500 feet down on the Snowdrift No. 1 claim. Assays from this shaft, it is said, have shown from 12 to 32 per cent copper content with attractive gold and silver values as well. The shaft is to be located in the mineralized schist belt, assays from this surface schist returning as high as 10 per cent copper.

The directors yesterday authorized the officers of the company to build a good road from Skull Valley station to the property, a distance of about three miles. Camp will be made and work on the property started at once.

LIBERAL MILLING STARTS MINES TO MOVING

(From Tuesday's Daily.)

One of the most important movements in its line to assist leasers of mines in the Harrington field, is the milling proposition inaugurated by O. W. Blickenstaff and Henry Braun, who are taking over the old Tiger Gold Co., stamp mill and opening up a custom market for ore. The old plant has been completely remodeled and equipped with new apparatus, in which steam has been discarded and gasoline power substituted.

This move is due to leasers on the Ora Belle, numbering five sets, being active and other mines in that belt being in a productive state, many thousand tons of ore being ready for treatment. Plating and concentrating will be the recovery, and the price per ton for treatment of any product under \$40 per ton has been figured at the remarkably low price of \$4 per ton. It is this action which has started more mines to operate in the above field than has ever been known. Each patron also is to be given the right to be present when his product is being handled from the time it passes through the rock breaker until it is cleaned up on the plates, or the tables.

Another Company Is Preparing To Enter Big Chino

(From Tuesday's Daily.)

Another oil movement for the Big Chino valley field is being closed up, a firm known as the Southwest Oil Company having been organized. Plans call for exploration to begin forthwith. A. C. Parry, of Jerome, secretary-treasurer, arrived in Prescott yesterday, and is to remain here indefinitely, to assist in the initial movement. With him are associated J. E. Fisher, of Oatman, the president, and George Fitzpatrick of Humboldt, vice-president. The company has acquired a large holding of what is pronounced desirable land to explore.

HUN PLANES DOWNED

LONDON, Jan. 12.—British airplanes on the Italian front attacked a group of seven hostile machines and brought down four, it is announced. The British lost none.

GIRL KILLS ROBBER

MINNEAPOLIS, Jan. 12.—A robber who attempted to hold up an office here today, was shot and killed by Mabel Drummer, 28 years old, a clerk.

DEVELOPMENT AT BLUE BELL TO CONTINUE

CONSOLIDATED ARIZONA EXPECTS TO SPEND BIG SUM IN DIAMOND DRILLING IN LOWER LEVELS; WILL DRIFT ON 800.

MAYER, Ariz., Jan. 14.—Fifty thousand dollars will be spent by the Consolidated Arizona Company on the further development of the Blue Bell mine this year. The new work will consist of diamond drilling horizontally on the lower levels, running a drift on the 800-foot level to the south end of the mine to tap the ore that has recently been opened at the shallow depth of 75 feet and the opening up in a thorough manner the new 1,200-foot level. The next 12 months will be an extremely interesting time in the life of this now famous mine. Already, the new work on the 1,200 level, has found the big ore body that furnished a third of the output of the mine last year on the 1,000-foot level. In the drift that is being run north from the shaft on the 1,200, the south end of the lense of ore has been struck and followed about 75 feet. On the south end on the 1,000-foot level this same ore body tapers down as all lenses do, and now on the 1,200 level, the same lense has been found and is widening out as the drift goes north. So far, the ore body is 15 to 16 feet wide and the values are running about 4½ per cent copper and from \$6 to \$8 in gold and silver, which is a little higher in the three metals than on the 1,000 level. It is gratifying to find that the values not only hold, but are increasing in gold and silver with depth, which is now high enough to pay all cost of mining and treatment. The output of ore from this mine for the past year was slightly over 100,000 tons. The ore reserves have been kept up and with the anticipated ore on the 1,200 level, the reserve will be greatly increased within the next six months.

At the DeSota mine, owned by the same company, an additional 100 feet will be sunk right away from the 200-foot shaft. While this mine is only about three miles southwest of the Blue Bell, it is found that the ore is more silicious and about the same grade in values. The ore lenses are not so long, are thicker and are more numerous than in the Blue Bell. The mine produced about 50,000 tons last year.

Between these two mines, there are several properties of merit which show an outcrop indicating that the ore is to be found in the same courses as in the two big mines at each end. The Blue Bell Extension Copper Company begin sinking a shaft a short distance over the south line of the Blue Bell mine last week. The company was organized by J. E. Garber, who is president and C. J. Muddock, who is vice-president, who have been in the employ of the Consolidated Arizona Company at the Blue Bell mine for several years. It is expected that the extension of the Blue Bell ore bodies will be encountered in the shaft in not to exceed 50 feet. The secretary of the company is L. A. Denman, of Humboldt. The stockholders of the company are mostly employees around the two mines and the smelter at Humboldt. The work in the shaft is in charge of C. J. Muddock.

Probably no strike of ore in this Mayer camp has been heralded with so much enthusiasm as the one just made in the Binghamton mine. In a drift run north 1,400 feet from the main shaft, on the 100-foot level, ore has been broken into and followed about 20 feet, assays running from 4 to 23 per cent copper. It is in an entirely new ore zone, the nearest ore body being 800 feet away. The strike was made about 300 feet south of one of the best surface outcrops on the property and it may be that the south end of a long ore lense has been encountered. On the 600-foot level, a drift run south has struck the extension of the large ore lense on the 400-foot level. Face samples run from 6 to 27 per cent copper. Diamond drilling on this level is blocking out the ore recently determined to be one of the largest bodies in the mine, running from 30 to 50 feet in width. It is estimated that the mine now has five years of ore in sight at the present capacity of the mill, which is about 200 tons daily.

The taking over of the Barbara mine by the newly organized Monte de Cobre Copper Company was completed this week. The officers are: President, W. A. Tucker, of Bisbee; vice-president, John Ross, of Bisbee; secretary, R. E. Walker, Mayer and treasurer, J. R. Robertson, Mayer. For the past four months, the development of a large group of claims on the south end of Copper mountain has been in progress, the capital having been furnished by the Bisbee people. A cross-cut tunnel has already passed through about 40 feet of ledge material nearly rich enough for commercial copper ore.

There seems to be no question of

MANY PAY LAST RESPECTS TO ALLEN HILL

FUNERAL OF DEPARTED ATTORNEY IS HELD AT FAMILY HOME ON SUNDAY WITH BURIAL IN MOUNTAIN VIEW.

(From Tuesday's Daily.)

The funeral of Allen Hill, the highly-esteemed Prescott lawyer who died at Iron Springs on the 10th, while in route to Phoenix, took place Sunday afternoon at 3 o'clock. A large concourse of friends and associates gathered at the residence of his sister, Miss Mary E. Hill, 416 Weaver street, to pay the last tribute of respect to this most excellent citizen. Aside from the profusion of beautiful floral offerings sent in by friends and the brother lawyers of the deceased, the funeral ceremonies were notable for their simplicity. The hymn, "Come Unto Me," was sung by Robert E. Morrison, who had been associated in practice with Mr. Hill for about 18 years. A brief tribute to the high character of Mr. Hill was given by Mr. E. S. Clark. Miss Juanita Morrison sang "Nearer, My God, to Thee," in a most impressive and effective manner. Prayers were offered at the residence and at the grave by Rev. Eustace Flamenca.

The interment took place at Mountain View cemetery. The pallbearers were J. E. Russell, P. W. O'Sullivan, L. H. Beyerle, W. W. Elliott, P. H. Stack and E. S. Clark.

Aside from his sister, Mr. Hill left no relatives. He was born at Beardstown, Illinois, April 26, 1861, and was one of a family of seven children.

Prescott Girl Is Honored With Post Of Responsibility

(From Tuesday's Daily.)

It will be of interest to the many friends of Miss Catherine Tiernan, daughter of Mrs. O. A. McDermid, to learn that this young lady, a former Prescott High school girl, has been appointed chief stenographer in the office of the alien property custodian, at Washington, D. C. The position is one of responsibility, and for which duty she received a salary of over \$1,500 per year it is stated. Miss Tiernan is a graduate of the commercial department of Prescott High school, and left this city last September to enter one of the leading business colleges of Los Angeles, where she took advanced work along the lines of her profession, which she has mastered. Her present duties have to do with the property of the "enemy" as defined by the trading-with-the-enemy act of congress.

Miss Tiernan writes quite interestingly of her work and the strict manner in which the United States is looking after the war situation at the capital.

MEET AT TUCSON TO CONSIDER DROUGHT

(From Tuesday's Daily.)

A special emergency meeting of the League of the Southwest has been called for Tucson, January 18-19. This meeting is called to discuss measures for relief from the effects of the prevailing drought and, especially, to formulate plans to save the cattle of the southwest from immediate destruction.

While most of Yavapai county is particularly fortunate in not being hit by the terrible drought of late, at the same time, the nature of this meeting is of such a far reaching character that Attorney T. G. Norris has been appointed the official delegate of the Yavapai County Chamber of Commerce, to be present at this important session and represent the county at large.

MME. SCHRATT DEAD

LONDON, Jan. 11.—German newspapers announce the death in Vienna of Katharina Schrat, for years intimate with the late Emperor Francis Joseph of Austria.

Try the Journal-Miner for artistic job work.

The making of a big mine at the Arizona Copper, a mile west of this place. The ledge matter in the shaft bottom, is full of chalcophyrite and the same character of the schist is shown as in the big producing mines. The property is next to the old Hackberry mine which was and is still possible of large production in copper and gold. The company is fully financed to sink to the 1,000-foot level.

MEMBERS OF BAR ASSOCIATION EXTOL HILL

LOCAL ATTORNEYS DRAFT RESOLUTIONS EXPRESSING REGRET AT RECENT DEATH OF POPULAR PRESCOTT LAWYER.

(From Tuesday's Daily.)

Following is a complete copy of the resolutions recently passed by members of the North Arizona Bar Association upon the occasion of the death of Allen Hill, the deceased being a member of the association:

WHEREAS, the dread mandate of death has stricken the name of our highly beloved brother, Allen Hill, from the roll of the living, and

WHEREAS, the members of this association, who have known and worked with Brother Hill through years of labor at this bar, have come to such a realization of the splendid qualities with which he was so generously endowed, and have become so attached to him because of the constant loveliness of his character and disposition that, even in the gloom of our sorrow, we are able to cherish a just estimate of our brother's worth, though we confess our inability to clothe it in fitting and adequate language.

His character presented a harmonious blending of the highest and finest of manly attributes. Under all circumstances, he maintained a serenity of demeanor and poise of judgment that elevated even the ordinary phases of life, and permeated and dignified the larger and more important affairs in which he so frequently figured. Singularly free from pretense or ostentation, he was faithful in thought, word and deed to the highest of morals and virtues; as a man and a lawyer he was indeed "fairest among thousands, altogether lovely." If human failing ever betrayed him into the lapses common to mankind, they were never discernible even to his intimate friends and associates. To those whose rare privilege it was to have enjoyed insight into the inner recesses of his lofty nature, a great depth of unselfishness and devotion to others were disclosed. His intellectual gifts were of the highest, and his legal attainments, gained by years of faithful application, were at once the envy and admiration of his brethren at the bar. He was always gentle, unobtrusive, yet he was formidable as an adversary because of these very virtues, and the skill and genius which he devoted to his work. His daily life was an inspiration to all with whom he came in contact. His counsel was always wise, conscientious and honorable. The beauty and dignity of his soul shone in all his walks, like the beacon light of the Infinite, guiding upward and ever higher. In the loss of such a character, our association, the relatives of Mr. Hill, and the community have sustained a loss, which is irreparable. Therefore, be it

RESOLVED, that the affliction visited upon us by the death of our brother, while great and permanent, is susceptible of some degree of consolation as we contemplate the uplifting effect that his life and character have left upon us, and the great good that lives after him, serving as an example and guiding star so long as we shall live, and be it further

RESOLVED, that the death of our brother brings to the hearts of every member of this association a painful sense of personal loss, and to this association itself that consciousness that death has removed one of its most valued and lovable members, whose vacant place will be contemplated for many years with sadness, and be it further

RESOLVED, that we hereby extend to the relatives and office associates of Mr. Hill our profound sympathy in this hour of their deep bereavement, and be it further

RESOLVED, that these resolutions be spread at length upon the records of this court, as a lasting testimonial of our regard and in recognition of the merits and high attainment of our brother Allen Hill.

E. S. CLARK,

P. W. O'SULLIVAN,

ALEX. L. JONES,

Committee.

Northern Arizona Bar Association.

CAPABLE ENGINEER SUDDENLY CALLED

(From Sunday's Daily)

Argus Manning, a miner formerly of this section, died at a mining camp near Pinos Altos, New Mexico, on January 1, the sad news being received a few days ago by a cousin, P. C. Caldwell, a visitor yesterday from Drake creek district. The disease was pneumonia, and Manning was ill only 24 hours. Manning had been accepted to enter the aviation training school for officers at Fort Sam Houston, and was to have left for the camp on January 2. He was a skilled mechanical engineer and had studied aeronautics. He was aged 24 years and formerly worked in the Bulture mill.

Journal-Miner for fine job work.
